

PROTECTING YOUR PRODUCT, ENHANCING YOUR BRAND

Product Safety and Hygiene Policy

Version 02/270422

‘We ensure that the highest standards of packaging safety and hygiene are maintained and comply with the relevant packaging safety requirements to produce legally compliant products’.

The Management Team of Viscose Closures Limited recognise and accept our responsibilities for ensuring the continued hygienic manufacture and safety of our packaging products to various industries such as the Food and Beverage industry and are committed to a programme of continuous improvement.

We ensure that the highest standards of packaging safety and hygiene are maintained and comply with the relevant packaging safety requirements to produce legally compliant products. All reasonable precautions are taken and care exercised regarding packaging safety. In conjunction with our Quality, Health and Safety and Environmental policies we ensure that the management systems satisfy the requirements of the BRCGS Packaging Materials Issue 6 standard.

The CEO is responsible for ensuring continued commitment to packaging safety within the Company and for providing the necessary resources. Implementation and maintenance of the BRCGS Packaging Materials Issue 6 standard is the responsibility of the HSEQ Manager who is also the management representative.

All employees receive appropriate training and are responsible for complying with the Company’s packaging safety and hygiene procedures and for reporting to management anything that may compromise packaging safety.

The Product Safety and Hygiene Policy is subject to an annual review and we ensure that the Product Safety and Hygiene Policy is communicated to and understood at all levels of the Company. The Product Safety and Hygiene Policy is available to all relevant interested parties, through the company web site and upon request.
