Protecting your product, enhancing your brand.

## Celons

Viscose Closures has been one of my favourite suppliers to work with.

Their entire staff is very responsive and they are always willing to help.

Their product knowledge is second to none and they truly care about their customers.

I would 100% recommend Viscose Closures to anyone looking for caps or eco-friendly shrink bands.

— Kaufman Container Company

Do you need to make your container tamper-evident, protecting your brand whilst maintaining your environmentally friendly reputation?

## We have the solution for you!

Why not use our **Celons** – they're ideal for most food, drink, pharmaceutical and cosmetic producers and offer a practical, eco-friendly aesthetic solution.

### A unique product, our Celons are eco-friendly bands made from cellulose.

Supplied in a preservative solution, these bands are used as an external seal on your containers.

The Celon can shrink up to 30% of their original size and can fit around challenging shapes!

Easy to use, these bands require no machinery as they are hand applied while still wet. They shrink evenly as they dry, resulting in a high quality, luxurious finish on your container.

As they require no heat to shrink, they are perfect for heat sensitive products or flammable liquids or gases.

### Celons are made from extruded cellulose.

That means the main ingredient in these bands is wood pulp sourced from renewable sources!

The seals are bio-degradable and home compostable – you can put them in your food waste instead of disposing of these through conventional waste-streams.

Once extruded, these are cut to the size you require and packed securely in bulk packaging containers containing a mild preservative solution.

Our Celons are guaranteed for use up to 12 months from the date of manufacture, provided they remain unopened in their original container. They can withstand temperatures as low as -14 °F during this time!

## Key Benefits:

- Environmentally friendly
- Biodegradable & home compostable
- Suitable for most plastic, glass and metal containers
- Hand applied - no equipment needed
- Available in low MOQs
- Deters counterfeiting due to the unique appearance of the seal
- Secure, wrinkle-free, professional looking finish
- Enhances the appearance of your product
- Fits around challenging shaped containers
- Perfect for heat sensitive or flammable products
- Provides protection of compliance labelling (e.g. customs strips)

## Available in:

- Bands pre-cut to the size required
- Bands available in various diameters
- Standard colour range includes transparent, opaque & metallic bands
- Bespoke colours available on request - subject to minimum run size
- Can be printed with a message or logo
- Various perforation/opening options available

Samples & mock-ups are available on request

## Some of the markets we serve:

Alcohol and Spirits ; Health and Vitamin ; Confectionery ; Industrial Gas ; Hotel and Restaurants and Scientific Equipment

**Kaufman Container has been a leading wholesale packaging supplier in the United States for over 100 years.**

**I would strongly recommend Viscose Cellulose bands as a biodegradable alternative to plastic tamper caps. This innovative solution is just what we need to cut down further on unnecessary plastic and with low MOQ it's a viable option for the micro distillery"**

—  
Jessica Eade  
Owner, Dinorwig Distillery

**Viscose provide us with quality custom and environmentally friendly tamper sleeves that both do the job and improve the look of our products. Their customer service is on point, they have helped us out with orders on short notice!**

—  
Harry Calvert  
Owner, Ginger Beards Preserves

**Viscose Closures not only have an amazing product - their customer service is fantastic! They've helped us every step of the way. Using this fantastic closure has definitely helped in bringing our brand to market as an environmentally friendly business.**
