

Protecting your product, enhancing your brand.

March 2020

We continue to closely monitor developments with respect to the Covid-19 (Coronavirus). First and most importantly, we have implemented the appropriate actions to continue to provide our employees with a safe and healthy working environment.

The necessary measures taken to prevent the spread of illness will be implemented in line with UK Government, Department of Health Guidelines. Supply Chain challenges for many businesses will increase as the virus develops and Viscose are working closely with our Suppliers to mitigate any disruption to the distribution side of our business.

We remain in close contact with our global logistics network which will keep us well positioned to work through these challenges and will communicate changes in lead times at the earliest opportunity.

As a UK manufacturer of Film and Cellulose we are able to mitigate Supply Chain risk and do not perceive disruption to lead times at this stage.

The situation is changing daily and as information is validated, we will continue to provide you with updates and confirm logistics and delivery dates.

We remain committed to providing the excellent service and support that our customers have come to expect of Viscose throughout this situation.

Vince Minchella

Chief Executive Officer
