## Crown Closures

As a major supplier to Distillers, Craft Brewers and the Soft Drinks Sector Viscose Closures Limited are pleased to offer traditional pry-off crowns also known as beer bottle tops and bottle caps, primarily used for Beer, Lager, Ales, Cider and Carbonated Drinks.

The Crowns are produced from Electrolytic Tin Plated Steel (ETPS) and can be machine or hand applied.

They are manufactured to the highest European standards to ensure perfect seal and protection.

Offered in both gold & black, with \*free delivery from our UK warehouse within 3-5 working days subject to availability.

**All our crowns are 26mm and are supplied in box quantities of 10,000.**

We also offer a wide range of colours & finishes in 26mm that are made to order please contact us for more information.

# FEATURES ...

- Sleeving or bands can be produced on a reel for automatic application or as pre-cut sleeves/bands or preformed bands for hand application.
- Preforms are cut bands which have been formed into a shape by shrinking them on to a mould.
- Preforms make it easier for your production team to apply sleeves by hand and to obtain a superior finish.
- Products need heat to shrink either by a heat tunnel or heat gun which Viscose can supply
- Single or multiple lines of perforations can be introduced either vertically or horizontally to make sleeves easier to remove or more susceptible to damage if tampered with.
- Coloured, printed or holographic tear strips can be affixed or preforms in a vertical orientation and can be used in combination with perforations to provide an effective easy-open feature to the pack.
