

Protecting your product, enhancing your brand

Tamper evidence and anti-counterfeiting solutions for Distillers

As a major supplier to distilleries globally, Viscose Closures Limited supply a wide range of caps and closures as well as offering tamper evidence and counterfeiting solutions to enable you to protect your product safety and enhance your brand integrity.

We produce tamper evident bands made from four substrates: Cellulose, PET, PVC and PLA and are available in three formats tubing, cut bands and preformed bands. Viscose is also the only UK manufacturer of capsules, secondary seals for bottled products in a wide range of sectors, made from PVC or PET that can be fully customised to your specific requirements.

Viscose has a strong commitment to reducing its carbon footprint by developing environmentally friendly packaging and tamper evidence solutions. Cellulose bands are our core product made from extruded, plant-based cellulose, meaning the main ingredient in these bands is wood pulp obtained from renewable sources. Our seals are bio-degradable and home compostable allowing them to enter the food waste instead of disposing of them through conventional landfill waste-streams.

Viscose also has an extensive range of primary closures including; Bartops, Corks, Aluminium ROPPs and GPI closures to seal your bottle and protect the contents. Our extensive range of closures are suitable for food, beverages, consumer products and industrial packaging in a wide range of materials.

Renowned for our exceptional customer service, our friendly, dedicated team recognise the value in working in partnership with our customers and therefore offer expert technical advice, bespoke equipment and on site support.
