

Protecting your product, enhancing your brand

Industrial Gas Packaging Solutions

As a major supplier to the Bottled Gas sector, Viscose supply tamper evident solutions for pressurised and flammable gas cannisters.

Customers will be reassured that they are using a secure product by removing the tamper evident seal known as a Viskring.

A Viskring is an eco-friendly band made from Cellulose and is unique to Viscose. The bands are both Bio-degradable and compostable as they are made from extruded Cellulose, where the main ingredient in these bands is wood pulp sourced from sustainable resources.

The Viskrings are supplied in a preservative solution and used as an external seal. They are easy to use as they require no machinery and are hand applied while still wet. They shrink evenly up to 30% of their original size as they dry resulting in a high quality finish that easily moulds to challenging shapes.
