

Protecting your product, enhancing your brand

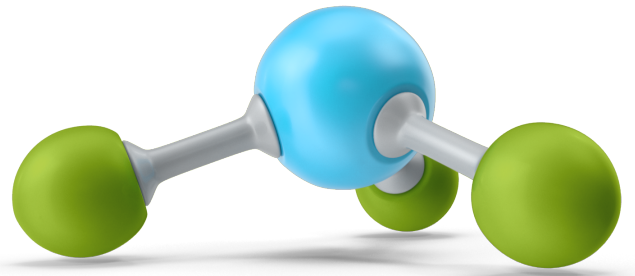

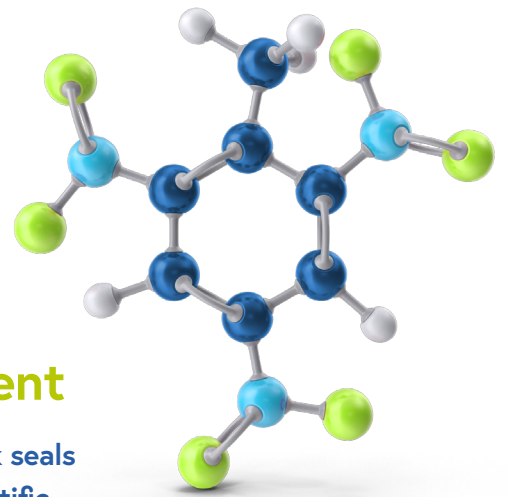

## Tamper Evident Seals for Pharmaceutical and Scientific Equipment

Viscose Closures Limited is a major supplier of tamper evident shrink seals to the Pharmaceutical; Industrial Gas; Scientific Equipment and Scientific Testing sectors. Our products are available in a range of materials which includes our self-shrinking Biodegradable Cellulose, heat shrink Compostable PLA (Poly lactic Acid), 100% recyclable PET and standard Non-recyclable PVC.

Protecting your products by using our tamper evident seals has never been more critical. Viscose tamper evident solutions are currently being applied to medical gas canisters; antiseptic gels; eye drops; lab culture tests; hand sanitisers and numerous other products that need identification and protection across the World.

Viscose have been proudly manufacturing in the UK for over 125 years and supply some of the major brand names as well as the NHS.

Please call to discuss how we can help you Protect Your Product and Enhance Your Brand.

# FEATURES ...

- Sleeving or bands can be produced on a reel for automatic application or as pre-cut sleeves/bands or preformed bands for hand application.
- Preforms are cut bands which have been formed into a shape by shrinking them on to a mould.
- Preforms make it easier for your production team to apply sleeves by hand and to obtain a superior finish.
- Products need heat to shrink either by a heat tunnel or heat gun which Viscose can supply
- Single or multiple lines of perforations can be introduced either vertically or horizontally to make sleeves easier to remove or more susceptible to damage if tampered with.
- Coloured, printed or holographic tear strips can be affixed or preforms in a vertical orientation and can be used in combination with perforations to provide an effective easy-open feature to the pack.
